Gas in the Stomach Is Dangerous

Physicians Recommend the Use of Magnesia.

Sufferers from indigestion or dyspepsia should remember that the presence of gas or wind in the stomach invariably indicates that the stomach is troubled by excessive acidity. This acid causes the food to ferment, and the fermenting food in turn gives rise to noxious gases, which distend the stomach, hamper the normal functions of vital internal organs, cause acute headaches, interfere with the action of the heart, and charge the blood stream with deadly poisons, which in time must ruin the health. Physicians say that to quickly dissipate a dangerous accumulation of wind in the stomach and to stop the food fermentation which creates the gas, the acid in the stomach must be neutralized and that for this purpose there is nothing quite so good as a teaspoonful of pure bicarbonate of soda. This is a little water immediately after meals. This instantly neutralizes the acid, thus stopping fermentation and the formation of gas, and enables the inflamed, distended stomach to proceed with its work under natural conditions. Bicarbonate of soda is obtained in powder or tablet form from the Barre Drug Company or any druggist; but as there are many different forms of magnesia, it is important that the bicarbonate, which the physicians prescribe, should be distinctly asked for.

CATTLE PRICES AG.

Heavy Animals at Brighton and Watertown Yards—Hogs Higher.

Brighton, Mass., Sept. 8.—All trains were late at the Brighton and Watertown stockyards yesterday morning, but the demand for beef stock was so light that prices sagged off, especially for the better class of cattle. Hogs were higher and calves firm. More cows were promised for the milk cow trade and shippers were talking higher prices, especially for the best milkers.

Arrivals at both yards for the past week were very heavy, the total including export stock, being 112 cars against 87 cars for the preceding week. Arrivals for the day at the Brighton yards were 17 cars from the Boston & Maine railroad and six cars from the Boston & Albany. During the week arrivals at the Brighton yards included 29 cars of export cattle, 10 cars of cattle and five cars of hogs from the West, 16 cars of livestock from the West, 12 cars from the Boston & Maine and one car from the Boston & Albany. Arrivals at Watertown were 16 cars, including all kinds of livestock.

Heavy cattle were slow of sale at 8c, though some shippers were asking more. For average tops 7½@8c was bid, with good cattle at 7@7½c, and light cattle at 6@6½c.

Owing to the Jewish holidays, all light beef was in quiet demand, and prices were easier, especially for tops. Best cows sold around 5½@6c, with occasional fancy animal bringing 6½@6¾c. Good cows sold at 4½@5c, ordinary cows at 3½@4c and canners at 3c.

Bulls were in fair supply and sellers found it difficult to get over 6c, even for fancy animals. The range for bulls was 5½@6c, with ordinary bulls at 4½@5c and bolognas at 3½@4c.

Calves held up well and some fancy lots sold as high as 10½@11c. Good lots brought 9½@10c, fair lots 8@9c and grassers and milkers 6@7c.

Hogs were firm and higher, sales being made at 7.00@7.50c for the best lots, with rough lots at 7@7½c and boars at 4c.

Sheep and lambs were in fair supply and prices for the best stock were firmer. Lamb sold at 7@8c, and sheep at 5@6c, these prices being for the best stock.
